My Story

My problem as a data scientist/ analyst:

- Sometimes more focusing on analytic or modelling
- We are talking to others like they know our circles/work
- Users are not understand about what we have right now.

So the main point is, how to show our work? With a convenient way?

Flask

Introduce Streamlit

Streamlit.

**The fastest way to
build and share data apps**

Turn data scripts into sharable web apps in minutes. All in Python. All for free. No front-end experience required.

Installation and Tutorial

```
pip install streamlit
```

```
streamlit hello
```

```
PS D:\> streamlit hello
```

```
Welcome to Streamlit. Check out our demo in your browser.
```

```
Local URL: http://localhost:8501
```

```
Network URL: http://192.168.1.15:8501
```

```
Ready to create your own Python apps super quickly?  
Just head over to https://docs.streamlit.io
```

```
May you create awesome apps!
```

▼

Select a demo above.

Welcome to Streamlit! 🙌

Streamlit is an open-source app framework built specifically for Machine Learning and Data Science projects.

👉 **Select a demo from the dropdown on the left** to see some examples of what Streamlit can do!

Why

Embrace Python
scripting

Weave in interaction

Deploy instantly

Embrace Python scripting

Hello world

Welcome to our demo

Made with Streamlit

```
import streamlit as st

st.title("Hello world")
st.subheader("Welcome to our demo")
```

Just a simple code
demo.py

streamlit run demo.py

Weave in interaction

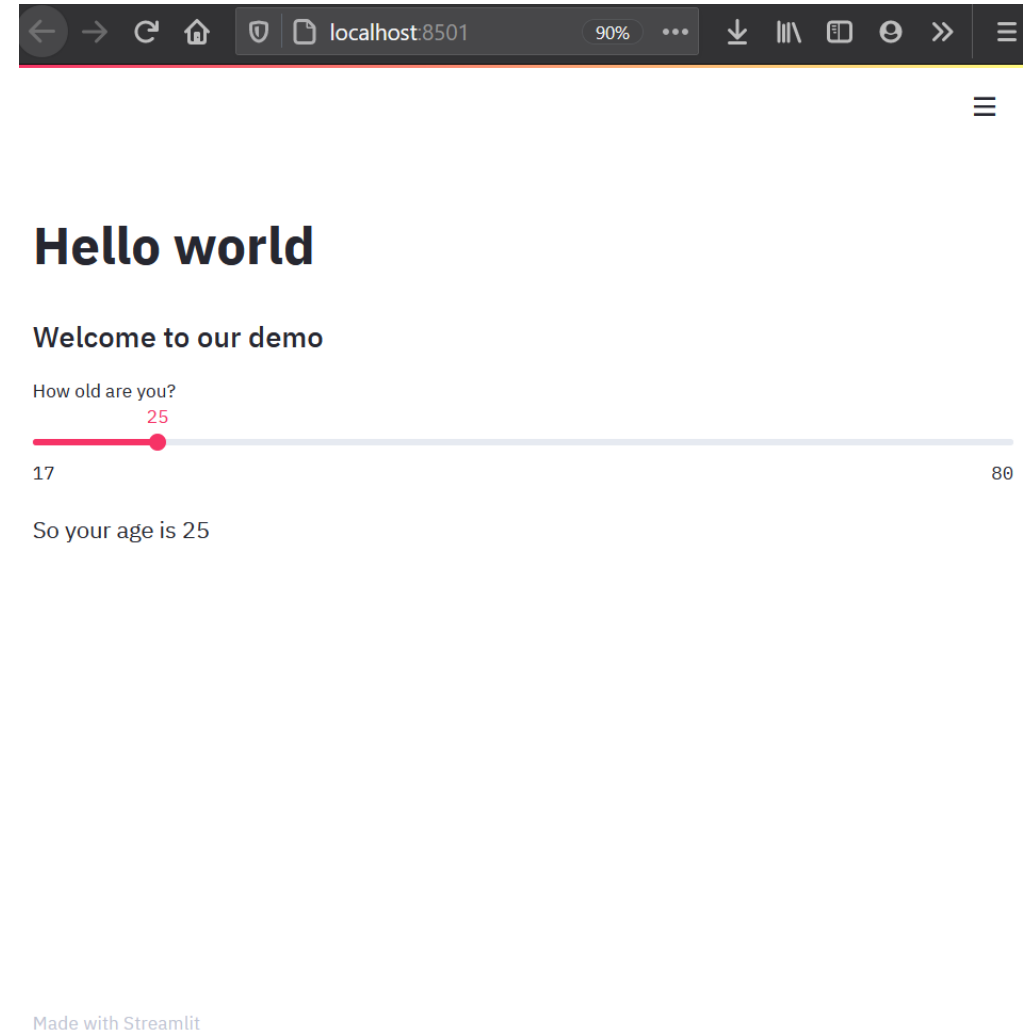

```
import streamlit as st

st.title("Hello world")
st.subheader("Welcome to our demo")

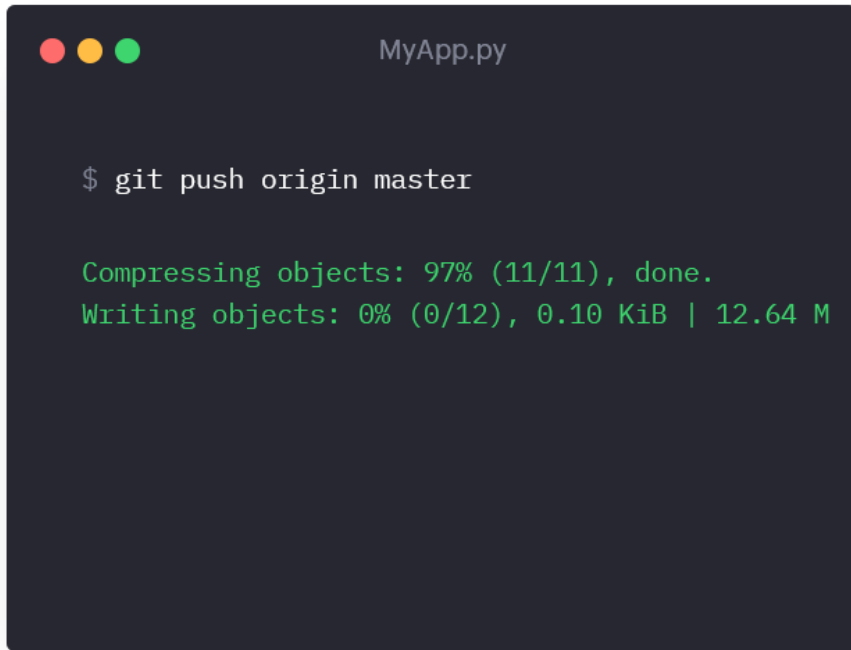

age = st.slider("How old are you?", 17, 80, 20)
st.write("So your age is {}".format(age))
```

Just a simple code
demo.py

streamlit run demo.py

Deploy instantly

A terminal window titled "MyApp.py" with three colored window control buttons (red, yellow, green) in the top-left corner. The terminal displays a command prompt followed by a git push command and its output.

```
$ git push origin master
```

Compressing objects: 97% (11/11), done.
Writing objects: 0% (0/12), 0.10 KiB | 12.64 M

Ready to serve!

Good for dashboard

Hello world

Welcome to our simple dashboard of Surabaya

	District	Areas Region(km square...	Borough	Latitude	Longitude
0	TEGALSARI	4.2900	Surabaya Pusat	-7.2798	112.73
1	GENTENG	4.0500	Surabaya Pusat	-7.2591	112.74
2	BUBUTAN	3.8600	Surabaya Pusat	-7.2500	112.73
3	SIMOKERTO	2.5900	Surabaya Pusat	-7.2386	112.75
4					

```
import streamlit as st
import pandas as pd
import plotly_express as px

data = pd.read_csv("Surabaya_Full_of_Data.csv")
st.title("Hello world")
st.subheader("Welcome to our simple dashboard of Surabaya")

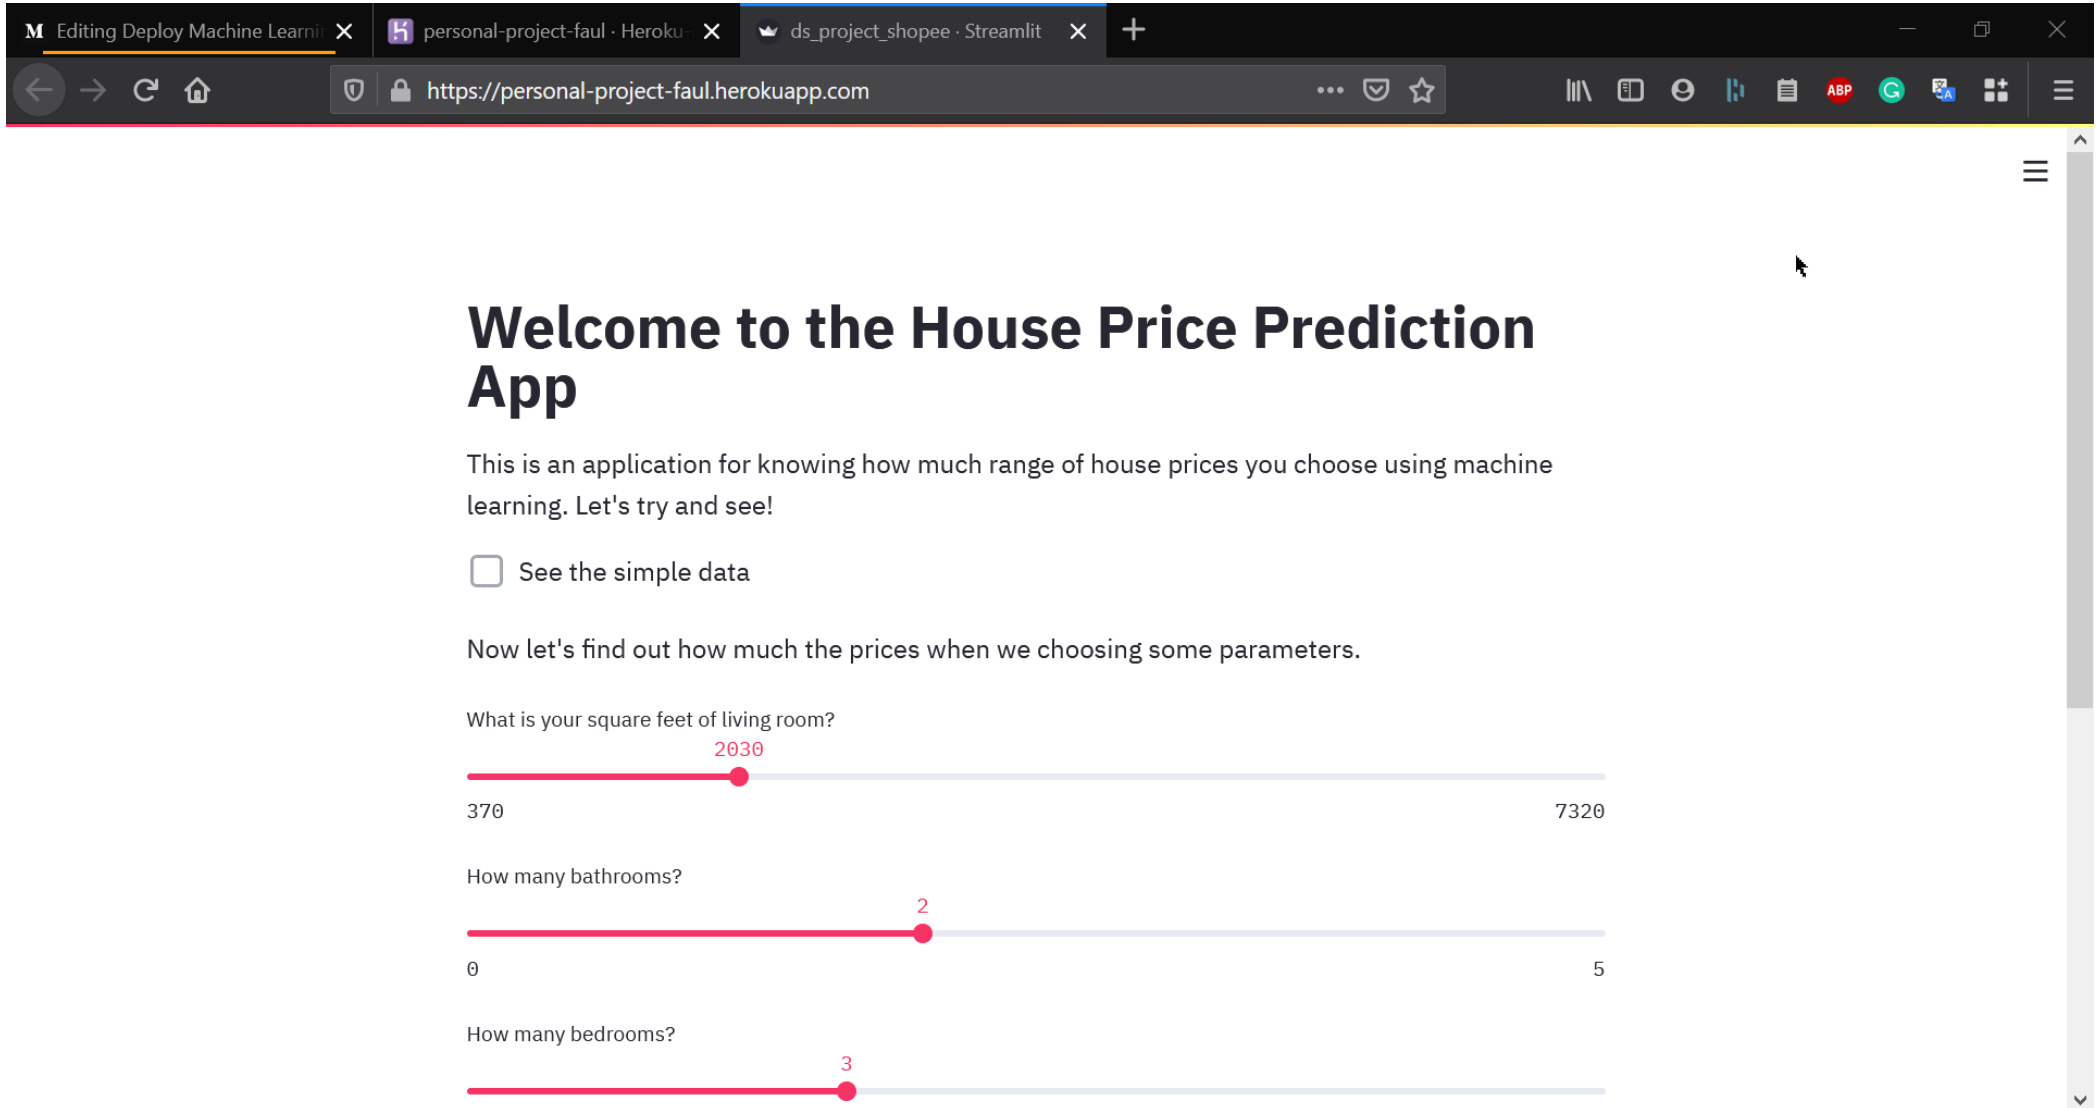

st.write(data.head())
fig = px.bar(data, x='District', y='Total Population', title='Total Population based on District')
st.plotly_chart(fig)
```

Total Population based on District

What can you build?

House Price Prediction

The screenshot shows a web browser with three tabs: 'Editing Deploy Machine Learning', 'personal-project-faul · Heroku', and 'ds_project_shopee · Streamlit'. The active tab is 'personal-project-faul · Heroku', displaying the URL 'https://personal-project-faul.herokuapp.com'. The page content includes a title, a description, a checkbox, and three sliders for input parameters.

Welcome to the House Price Prediction App

This is an application for knowing how much range of house prices you choose using machine learning. Let's try and see!

☐ See the simple data

Now let's find out how much the prices when we choosing some parameters.

What is your square feet of living room?

2030

370 7320

How many bathrooms?

2

0 5

How many bedrooms?

3

What can you build?

Simple Dashboard about Surabaya

✕

What data do you want to see?

OpenStreetMap

What data do you want to see?

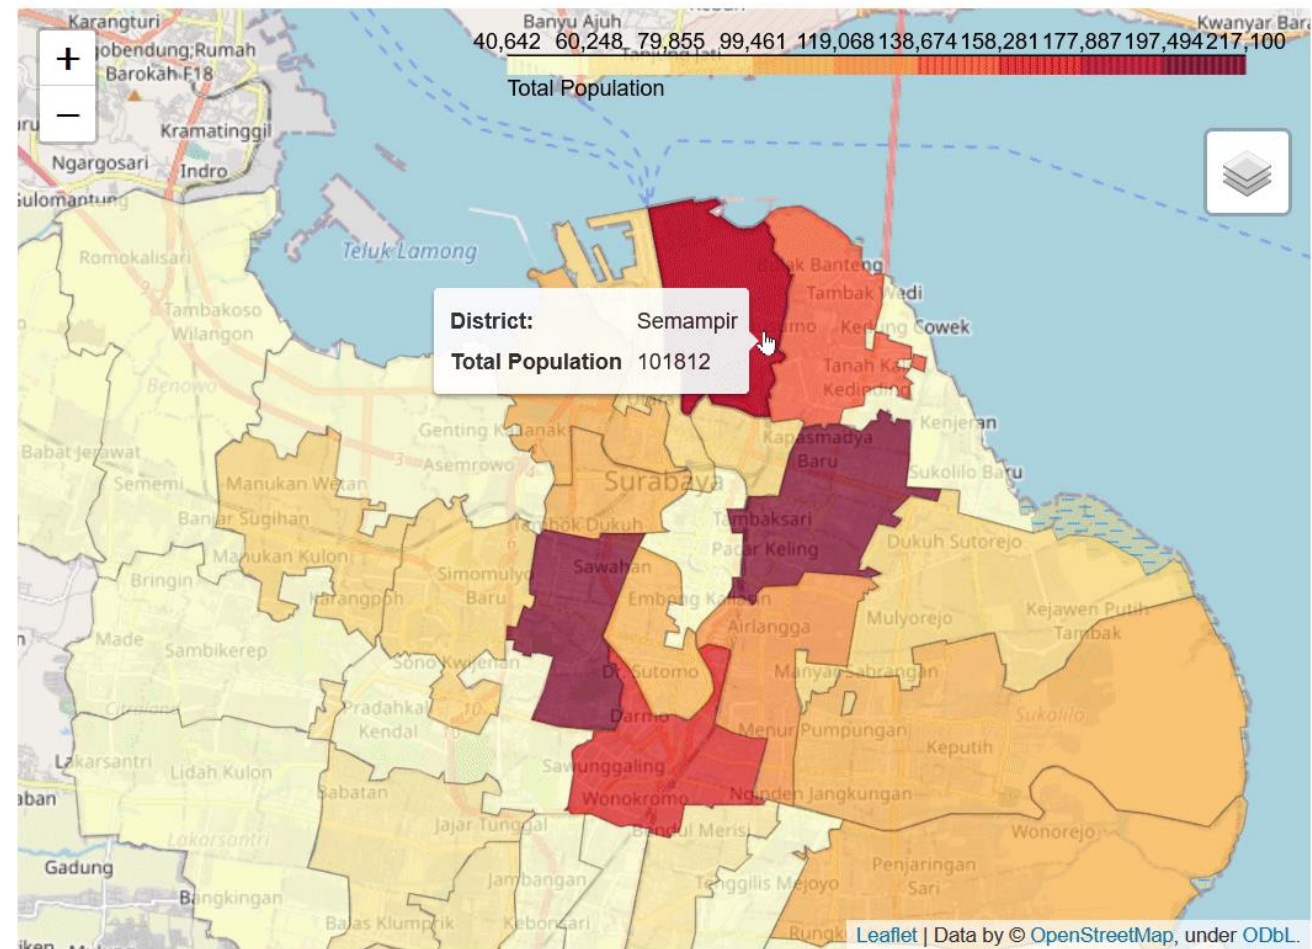

☒ Total_Pop

☐ Area_Region

☐ Male_Pop

☐ Female_Pop

Map of Surabaya

Demo

Thank you!
